

## OXYGEN FILTER & GAS FILTER

For installation in the gas supply lines for protection of working tools and regulators against contaminations. Helps to increase service life of downstream fittings and equipment.

Working pressure: 4,400 PSIG/  
300 bar

Exchangeable 80 micron  
sintered metal filter.

### OXYGEN FILTER

Model: FT-OF  
0901-5515  
Replacement Cartridge: 0901-5335  
*(Two replacement filter cartridges are required per line filter.)*

### FUEL GAS FILTER

*Identical to picture shown; but, for fuel gases*

Model: FT-GF  
0901-5500  
Replacement Cartridge: 0901-5330  
*(Two replacement filter cartridges are required per line filter.)*

### Standard Connections:

- 1" NPT F / 1" NPT F • Other connections available upon request

### Gas-types:

- Acetylene • Natural Gas • Oxygen • Inert Gases

### Design:

- Body in Brass • Cartridge housing in stainless steel • Other materials on request

Max. Working Pressure (PSIG)	Connection		Material
	Inlet	Outlet	
Acetylene 21.8	1" NPT Female	1" NPT Female	Brass/Stainless Steel
Other Fuel Gases 232	1" NPT Female	1" NPT Female	Brass/Stainless Steel
Oxygen, Compressed Air and Non-flammable Gases 232	1" NPT Female	1" NPT Female	Brass/Stainless Steel
