

STOP STARVING YOUR TORCHES!

Cutting failures occur when hoses are kinked and gases can not flow properly. Extensive kinking shortens hose life by creating cracks and dangerous gas leaks.

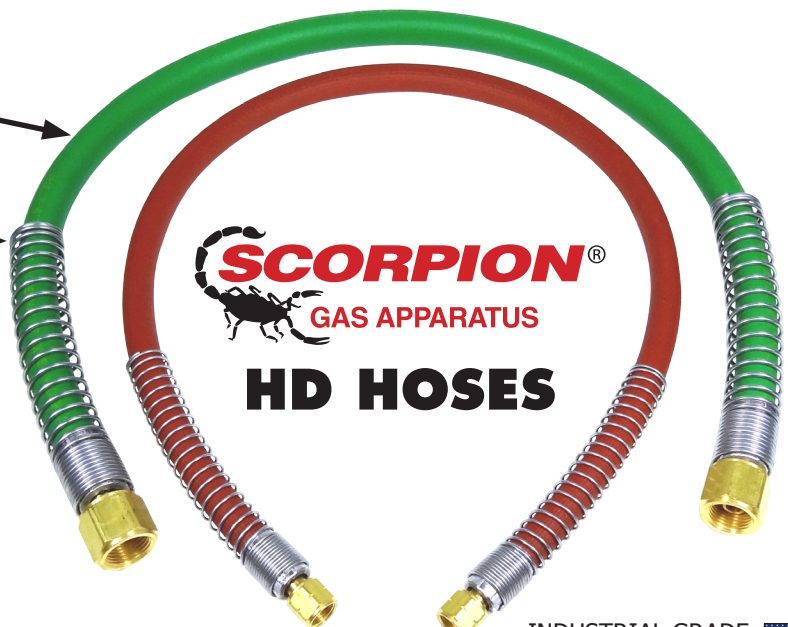

Ensure full flow of gases and improve cutting performance with a longer lasting, heavy duty hose. **SCORPION™ HEAVY DUTY HOSES** are tough and won't let you down.

**Heavy Duty
Mill Grade Material**
Hoses Last 2-3x Longer

Strain Relief Devices
Prevent Kinking & Cracking

Outer sleeve available for protection against high temperatures and extreme conditions.
